with a wide range of
solutions and options.

Product description

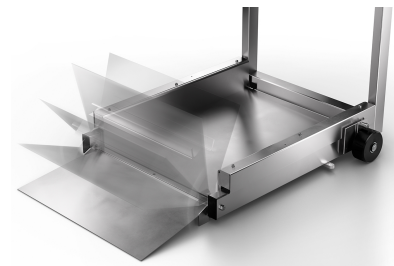

Numerous applications require mobile weighing systems. Complex installations and long transport distances to centrally stationary weighing installations can be reduced to acceptable levels or ca perhaps be avoided. The mobile floor scale iL Special 750M/MP is especially suitable for products up to 600 kg and short driving distances allowing maximum maneuverability even in smaller areas. In addition to mains operation, the mobile floor scale can also be battery-operated. Quick change to battery operation thanks to easy-to-remove battery box with handle. For use in the chemical and petrochemical industry an explosion-proof version for mains or battery operation is available. When changing the weighing location the entire mobile system must be tilted with the drive-on ramp in raised position.

iL Special 750M/MP

Highlights

- Low weigh platform height of only 53 mm
- Particularly sturdy construction of the mobile frame
- Weighing terminal can be rotated by 330°
- Explosion-proof version

Foldable ramp

Options

- Mobile frame and load receptor entirely made of stainless steel
- Battery holder
- Battery box for battery operation
- Weighing terminals for use in zones 1/21 and 2/22
- Ex battery box
- Mains supply 24 V AC/DC

Weighing terminal can be rotated by 330°

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
